

SCKOOLKOD

Sckoolkod is an ERP Platform that was built as a means of give back to the community for the sole reason of making the education system more effective

The System Aids The School Teachers and all administrative arm of the school to effectively manage students and other activities of the school

Our ERP platform will aid the Recording of Students Performance, Keep accurate record of all students and teachers information and will also help parents know their wards status in Classes and also their fee status

The Administrative Arm of the school overseas the general running of the school as well as allowing the creation of accounts of Teachers and Students through a unique Code Generated Only for the Admin of the School; the admin also overseas other things like expenses, Students Population E.T.C, The teachers goes further to creating Classes and then creating students inside each classes, The teacher is also responsible for creating performances and creating subjects for each class, The students then goes further to log into their accounts by a default mail generated once a teacher creates a student, then has access to his/her classroom on the platform, the students sees his/her performance other students of

the classroom he/she is into, sees his/her fee status and a lot more things.

We are driving towards making **SCKOOLKOD** look more like a real classroom on the web.
